Capabilities Statement

KZW Services LLC is a full service general construction contracting company serving in the U.S Virgin Islands since 2007. KZW is an expert metal roofing designer and building construction company with systems designed to withstand category 5 hurricanes. Since we are a smaller business compared to many other full-service firms and handle practically every aspect of each project in-house, our competition is often unable to compete with our pricing.

KZW Services LLC has spent over 20 years serving the construction needs of the Virgin Islands. We have nurtured veteran workers and project management in order to develop integrated operations to maximize efficiency, productivity, and attention to detail. We excel in providing design-build services for steel buildings and concrete structures, along with wood and metal roofing, general construction, and interior finishings.

To constantly improve our understanding of our clients' needs and to ensure that our products exceed their expectations and are completed successfully on time and within budget.

Core Competencies

- Steel Building Erection
- Concrete Construction
- Roofing
- Trucking and Dumpsters
- Demolition
- Plumbing and Electrical
- Exterior and Interior finish
- Turnkey Projects

Differentiators

KZW has developed a veteran, experienced crew that can handle virtually any type of job and allows us to pass our lower costs and quality work to our customers. Our local relationships and programs allow us to quickly ramp up extra personnel for larger jobs when needed and nurture close contacts that enable us to overcome any contingency or hurdle that may present itself quickly and efficiently in order to keep a job on time and on budget.
